Total Analysis by Country

Key Points:

- Highest sales and customer activity in the United States (€12.82M sales, 400K orders), France (€5.09M sales, 256K orders), Germany (€3.43M sales, 169K orders), and Mexico (€7.59M sales, 248K orders).
- Other countries (UK, Brazil, China, India, Italy) have substantial sales but lower figures than the top performers.
- Margins vary e.g., US profit margin at 11.58%, France at 14.29%, Germany at 8.12%.
- **Summary:**

This cross-country dashboard maps sales, orders, and margin distribution. It identifies the US and France as top markets, meaning strategic focus here could yield continued growth. Margins and customer count highlight profit centers and operational strengths.

Global Sales & Profit Overview

Total Sales per Market

Top 10 Country Analysis

Order C..	Order Quantity	Profit Mar..	Total Custom..	Total Sales
United Stat..	4,526	360K	2,047	400K
France	2,590	230K	1,215	256K
Mexico	2,814	223K	1,251	248K
Germany	1,748	151K	809	169K
Australia	1,583	145K	812	162K
United King..	1,439	127K	656	142K
Brazil	1,472	118K	666	132K
China	1,098	94K	534	105K
Italy	848	75K	404	85K
India	852	73K	412	82K

Key Points:

- Overall global sales: 3M, with a profit margin sum of €2.795M.
- Sales per market: USCA (1,611), Europe (830), Office/corporate: 2,870/1,408.
- Sales per year: 399K sales and 2,041 customers in 2016; a fluctuating trend shown over several years.

Sales over time

Total Supply chain Analysis

Total Customers	15,519
Order Quantity	33,667
Profit Margine Sum	2,795K
Total Sales	3M

Summary:

This overview connects yearly and market segment sales, showing where performance spikes and where growth stagnates. Variation by sector and year helps illuminate future targeting for resource allocation.

Order Item Analysis

Key Points:

- Total customers: 15,519; Order quantity: 33,667.
- Discount rates and average profits per order are visualized, helping track customer activity and profitability.
- Order item totals range widely, illuminating what products or groups are driving volume.

Summary:

By reviewing order volume, discounts, and profits, this slide lays out the link between sales incentives and business results. Watching these trends helps optimize pricing and promotional strategies.

Top & Bottom Product Analysis

Top 10 product sales

Bottom 10 product sales by region

Key Points:

- Top selling products include Perfect Fitness, Nike Mens Dri-FIT, OBrien Men's Field Stream, Pelican Sun stream, etc.
- Highest order count: Perfect Fitness (985), Nike Mens Dri-FIT (840), OBrien Mens Field Stream (802), with others close behind.
- Bottom products (by region): e.g., Merrell Womens (3), Ogio Race Golf (2), LIJA Womens Arg (2), GoPro HERO3 (2).

Summary:

This analysis distinguishes best performers from lagging products. Investing in popular items reinforces sales, while underperformers may need review—either for relaunch, improvement, or discontinuation.

Product Analysis

Profit vs Discount by Product

Order quantity per year

Sales by Category

Key Points:

- Profit vs discount by product: data plots show how discount rates impact profit per product.
- Top product (Field Stream Sportsman 16 Gun Safe): order profit 18K, avg. discount rate 9.96%.
- Market and order quantity variation by year and product category.

Summary:

Showing how discounting and category diversity affect profit, this slide encourages dynamic strategies for price management. Monitoring these metrics keeps product portfolios profitable and competitive.

Shipping Analysis and Payment Efficiency

Avg Shipping time by method

Payment Status

Shipping Mode	Order Status				
	ON_HOLD	PAYMENT_RE..	PENDING	PENDING_PA..	PROCESSING
First Class	114	6	266	560	330
Same Day	34	2	105	183	108
Second Class	156	13	392	871	422
Standard Class	457	35	1,044	2,212	1,186

Sales by Payment Method

Order Status by Customer count

Key Points:

- Average shipping times: Standard class (8.43 days for Europe, 10.39 USCA), first/second class faster.
- Payment methods: TRANSFER, DEBIT, CASH—Europe leans on DEBIT (376K), USCA varies (174K DEBIT, 42K CASH).
- Order status breakdown (COMPLETE, PROCESSING, ON HOLD, etc).

Summary:

Shipping speed and payment choice directly impact customer satisfaction and business flow. Reducing shipping days and offering flexible payment options are opportunities for operational improvement.

Payment Method Status Analysis

Sales by Payment Method

Payment Status

Shipping Mode	Order Status				
	ON_HOLD	PAYMENT_REVI..	PENDING	PENDING_PAYM..	PROCESSING
First Class	114	6	266	560	330
Same Day	34	2	105	183	108
Second Class	156	13	392	871	422
Standard Class	457	35	1,044	2,212	1,186

Order Status by Customer count

Key Points:

- Sales breakdown by payment method: TRANSFER, PAYMENT, DEBIT, CASH — each showing different popularity by region.
- DEBIT most popular in Europe (376K), moderate in USCA (174K).
- Customer status grouped by order type and processing step; flagged issues are quantified (e.g. 24 average issues flagged).

Summary:

This dashboard provides a snapshot of payment method efficiency, lighting up trends in customer choice and potential issues in the transaction process. Optimizing these methods can lead to smoother operations and happier customers.
